

## 1. Welcome

Younf operates an NFT creating application, which is accessible through the Younf application that we make available online at younf.com. We refer to this application as “the Application” further in the document.

## 2. Your relationship with us

This document and any documents referred to within it (collectively, the "Terms of Service") set out the terms of your relationship with us. It is important that you read and understand the Terms of Service before using the Application.

By using and accessing the Application, you agree to these Terms of Service. If you do not agree to these Terms of Service, please do not use the Application.

## 3. Information about us

Younf is a business name operated by Adam Sobotka as an economic entity under Czech Republic government permit number 02225263.

If you would like to contact us, please write to us using the details at the end of these Terms of Service.

## 4. Information about you

Your privacy is important to us. Please read our Privacy Policy to understand how we collect, use and share information about you.

## 5. Important warnings about the Application

### Digital asset transactions

- the Application allows you to initiate and manage digital asset transactions on blockchains. Dealing or trading in digital assets is inherently risky, as the prices of cryptocurrency and tokens can change rapidly. We cannot guarantee that the value of any digital assets that you purchase will not fall. You therefore buy or sell any digital assets through the Application at your own risk.
- Completion of transactions that you initiate through the Application also depends on the availability and operation of the Polygon network you interact with using the Application. Unfortunately, due to the decentralised nature of these networks and blockchain technology, there is no one single point of failure, and so neither we nor any particular party will be responsible to you for errors or any losses that you suffer as a result.

### Regulatory

- the Application does not facilitate the storage or sending of fiat currencies and we are not authorised to conduct regulated activities by the Financial Authority in the Czech Republic, European Union or any other regulator anywhere in the world. The digital assets that you manage through the Application are not covered or underwritten by any regulatory guarantees or compensation schemes. digital assets are handled by your wallet and the Application is used only as a tool to create such assets.

### Network fees

- In order to execute transactions on certain compatible networks, you will need to pay network fees. For instance, if you execute transactions on the Ethereum network, this is known as "gas". The network fees are set by the operators of the relevant compatible network and can fluctuate depending on the level of congestion on that compatible network. Transactions might fail if the network fee for that transaction is set too low.
- Transactions handled by the Application itself are sent through the Polygon network in order to minimize the transaction fee.

### Third party exchanges

- Assets created by the Application can be sold or exchanged by various third parties. Please refer to the terms of service of the third party used for the transaction as we don't cover the use of any third party exchange in our terms of service.

### Wallet

- The digital assets you manage through any wallet of your choice may be at risk if the security of the mobile device is compromised. You should therefore ensure that you keep your mobile device safe and secure in accordance with best practices recommended by the provider of your operating system, such as setting up a "strong" PIN to prevent unauthorised access and ensuring that you keep your software up to date.
- Keep the wallet recovery phrase and private key safe, ideally written in a physical form not stored in any digital platform.
- We are not responsible for the functionality nor security of your wallet, the Application purpose is to create digital assets that can be used in any compatible wallet.

## 6. Ending our relationship

- If at any time you do not feel that you can agree to these Terms of Service or any changes made to the Terms of Service you must immediately stop using the Application.
- We may also stop providing the Application as long as we give you reasonable notice that we plan to do this.
- Nothing in this paragraph affects any legal rights you may have under the law of the country in which you are resident.

## 7. Resolving disputes

- We hope you enjoy your use of the Application. If, however, you have a complaint or dispute with us relating to the Application, in the first instance please contact us at [legal@younf.com](mailto:legal@younf.com) so that we can try to resolve the dispute informally.
- In the unlikely event that we have not been able to resolve a dispute informally, we will then discuss and agree with you on the most effective way of resolving our dispute.

## 8. Changes to the Application

- We are constantly updating and improving the Application to try and find ways to provide you with new and innovative features and services. Improvements and updates are also made to reflect changes in underlying technologies.
- In order to do this, we may need to update, reset, stop offering and/or supporting a particular part of the Application. These changes to the Application may affect your past activities. Any changes to the Application will not affect your rights to the digital assets you created through the Application.

## 9. Changes to the documents

- We may revise these Terms of Service from time to time but the most current version will always be at <https://younf/terms-and-conditions.pdf>
- Normally, we will try to give you some warning before the new terms become effective. However, sometimes changes will need to be made immediately and if this happens we will not give you any notice.

## 10. Documents that apply to our relationship with you

- The current version of the Terms of Service contains the only terms and conditions that apply to our relationship with you.
- We intend to rely on these Terms of Service as setting out the written terms of our agreement with you for the provision of the Application. If part of the Terms of Service cannot be enforced then the remainder of the Terms of Service will still apply to our relationship.
- If you do not comply with these Terms of Service and we do not take action immediately, this does not mean we have given up any right we have and we may still take action in the future.

## 11. Law

- Law of Czech Republic will apply to all disputes and the interpretation of these Terms of Service. The courts of Czech Republic and European Union will have non-exclusive jurisdiction over any dispute arising from or related to your use of the Application.
- This does not affect your rights under the law of the country in which you are resident, including (where applicable) your right to have a dispute in relation to your use of the Application heard in the courts of that country.

## 12. Contact, feedback and complaints

- If you need to contact us in relation to these Terms of Service or any other document mentioned in them, please email us at [legal@younf.com](mailto:legal@younf.com).
- We value hearing from our users, and are always interested in learning about ways we can improve the Application. By providing your feedback you agree that you are giving up any rights you have in your feedback so that we may use and allow others to use it without any restriction and without any payment to you.
